Frozen-table post-training: matched no-gram controls | final

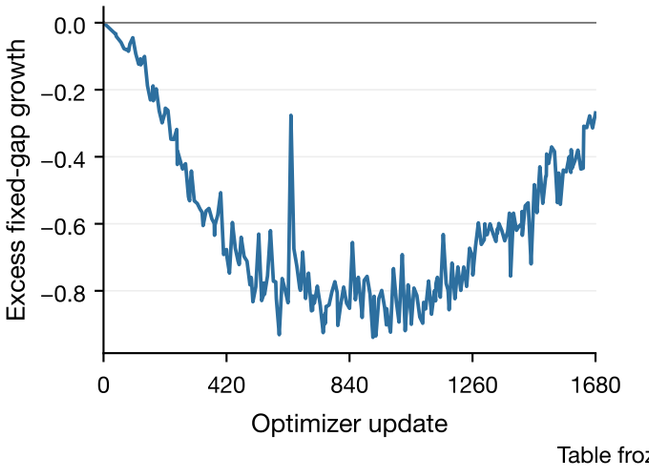

Table frozen from update 1 — Pretrained no-gram — Online train — Fixed validation

6.19M tokens/pass; LR 6e−4

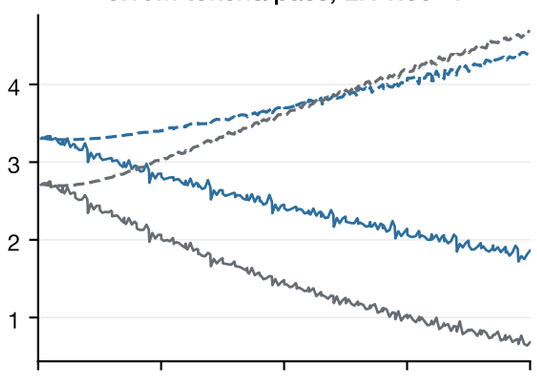

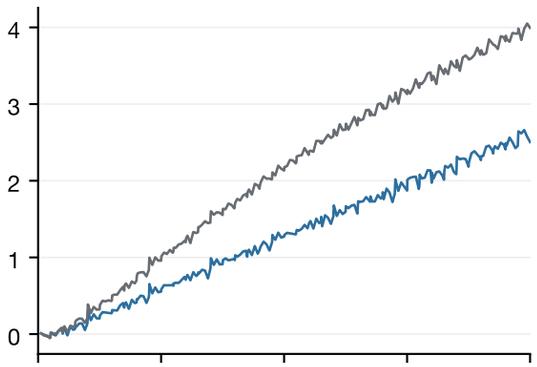

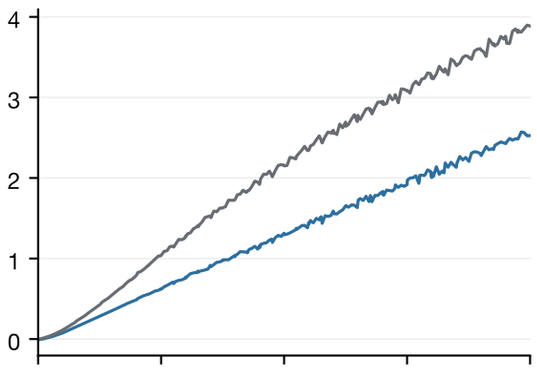

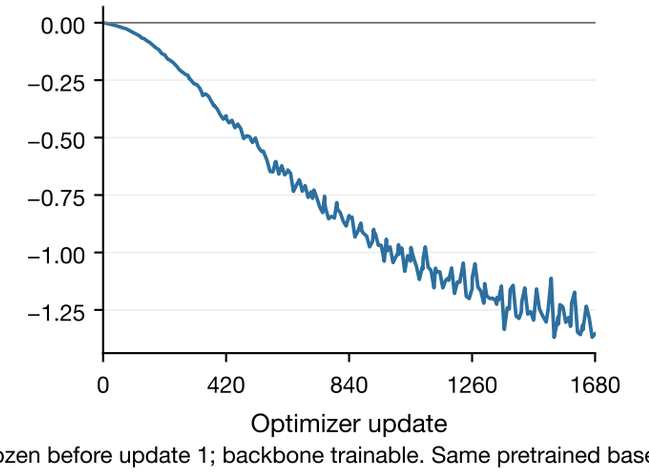

6.19M tokens/pass; LR 1.5e−4

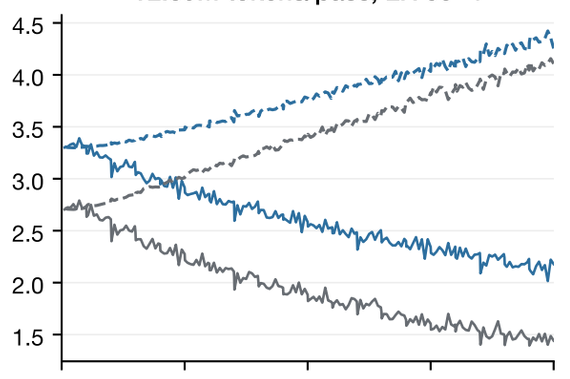

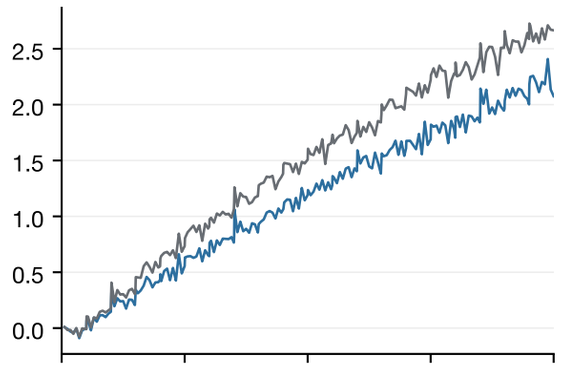

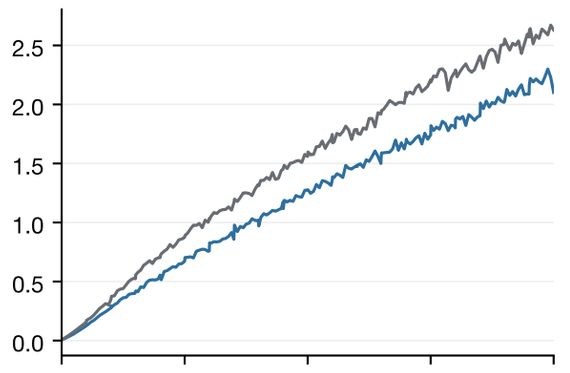

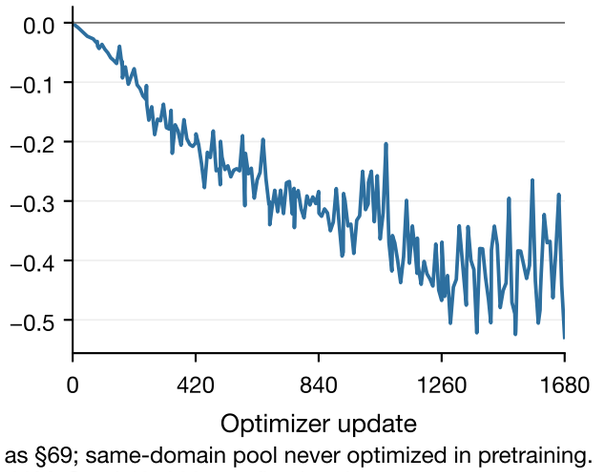

12.39M tokens/pass; LR 6e−4

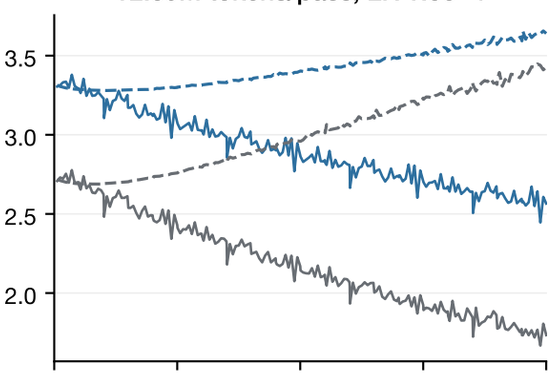

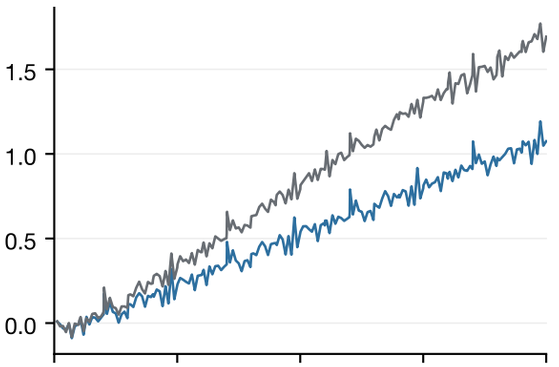

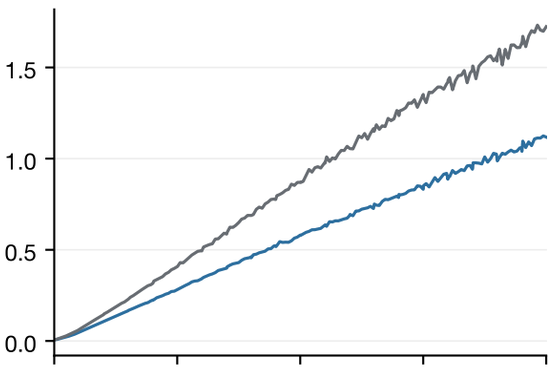

12.39M tokens/pass; LR 1.5e−4

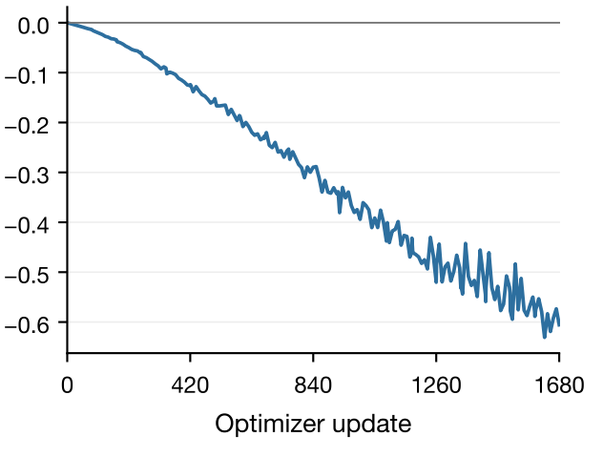

Table frozen before update 1; backbone trainable. Same pretrained bases as §69; same-domain pool never optimized in pretraining.
1680 updates: 40 passes over 6.19M tokens or 20 passes over 12.39M. Seed 42; 288-row fixed probes; raw curves.
Bottom: frozen-minus-no-gram fixed gap, minus initial difference. One pretrained/data realization; exploratory grid.
