Discovery path

Which component?

training improves
validation worsens

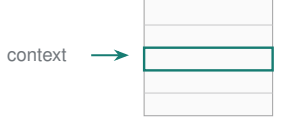

Forking

OPHIS screening + table ablation

Which predictions?

Removing tables removes
rapid divergence

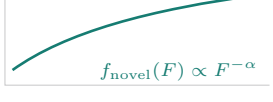

n-gram memory

Frequency analysis

Why does damage grow?

bigram: $\beta = 0.25$ vs. $\alpha = 0.23$

rare contexts leave more
continuations unseen

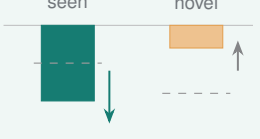

Novel continuations

Replay dynamics

PROPOSED MECHANISM

replay favors seen targets
and crowds out alternatives

Local sharpening
